

Definición de los elementos de la MDP de la empresa necroelectronica

$$\frac{e^{-\lambda} \cdot \lambda^k}{k!}$$

$$1 \ S = \{s_{-20} \dots s_0 \dots s_{20}\}$$

$$2 \ A = \{0 \dots 20 - s\}$$

$$3 \ T: S \times A \times S \rightarrow [0, 1] \quad T(s, a, s') \begin{cases} \frac{e^{-4} \cdot 4^{(s+a-s')}}{(s+a-s')!} s; & -20 < s' \leq s+a \\ 0 & \text{o.c.} \end{cases}$$

$$4 \ R: S \times A \quad R(s, a) = -(8a + 40) + \sum_{i=0}^{\infty} \left(\frac{e^{-4} \cdot 4^i}{i!} \cdot \right. \\ \left. \Delta (150 \cdot \max(0, \min(i, s+a)) - 5 \cdot \max(0, s+a-i) - 85 \cdot \max(0, i - s+a)) \right)$$
